## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on October 15, 2006. These drawings are accepted.

### ***Information Disclosure Statement***

2. The International Search Report cited in the IDS dated October 24, 2004, has been considered.

### ***Allowable Subject Matter***

3. Claims 1-49 allowed.
4. The following is an examiner's statement of reasons for allowance:

Claims 1-33 are allowed because none of the prior art of record discloses or suggests a variable current limited power source responsive to an output of a controller to vary the current limit, in combination with the remaining claimed features.

Claims 34-40 are allowed because none of the prior art of record discloses or suggests varying the current limit of a variable current limited power supply in response to a monitored power output of the power supply or monitored power needs of the load, in combination with the remaining claimed features.

Claims 41-42 are allowed because none of the prior art of record discloses or suggests supplying a variable current limited power to a load, the power needs of the load being in excess of the variable current limit, whereby the variable current limited power is fed to the load and the excess need is fed by a first power, in combination with the remaining claimed features.

Art Unit: 2836

Claims 43-49 are allowed because none of the prior art of record discloses or suggests a boost converter with a first variable current limiter, and a first power supply with a second variable current limiter, connected in a wired or configuration to cooperatively supply power with a second power supply to a load, in combination with the remaining claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Response to Arguments***

5. Applicant's arguments, see Remarks, filed October 15, 2006, with respect to the objections have been fully considered and are persuasive. The objections have been withdrawn.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US patent to Kinnard (7,112,896) discloses a similar system.
